**Subject:** Reciept of application for Installation of emission controls  
**Attachments:** 330150001214-0081TypeApplication.pdf

DES has received an application from Public Service Company of New Hampshire (PSNH) for an air permit to allow installation of pollution control equipment at PSNH's Schiller Station in Portsmouth, NH. PSNH states that the emission controls will be used as part of its Mercury and Air Toxics Standards (MATS) compliance strategy for the facility.

We are forwarding this application to you because you are an interested party in the separate, ongoing review of the application for renewal of the facility's Title V Operating Permit.

An electronic version of the application is attached. It is also available via DES's online OneStop Database at:

<http://des.nh.gov/onestop/index.htm> under;

PSNH Schiller Station

AFS #3301500012

Application #14-0081

Please contact me if you have any questions.
